

As an Indiana resident, I would like to convey the importance of the Indiana no-call list to me. I used to receive up to 12 calls PER DAY from telemarketers and now receive 1 or 2. I go on record to strongly oppose any action by the FCC to limit the Indiana law. I do not believe this is a federal decision, but a state decision. I will then take the opportunity to elect law makers in my state who support the no-call privacy law. Please do not disturb my time at home with my family by limiting this law and again allowing 12-15 calls per day from telemarketers to invade my home.
